

PHARMACOLOGY FOR THE DENTAL PRACTITIONER: AN OVERVIEW

3 CORE 1 CREDITS 8:00AM - 8:30AM REGISTRATION | 8:30AM - 12:00PM LECTURE

LEARNING OBJECTIVES

1. Understand basic concepts of pharmacology namely pharmacokinetics and pharmacodynamics.
2. Understand the mechanism of action of local anaesthetics, the factors that affect their onset and duration of action and the common complication associated with their administration.
3. Be informed of the analgesics currently used in dentistry. Understand the various adverse effects and drug interactions relevant to dentistry.
4. Understand the rational use of anti-infective agents in dentistry, both in terms of the management of existing orofacial infections and for prophylaxis against the development of bacterial endocarditis or other infection post treatment.
5. Be informed as to potentially problematic adverse drug reactions and drug interactions arise between medications the patient may be taking for acute or chronic medical conditions.
6. Understand the importance of organ function/disease status in altering the absorption, distribution, metabolism, and therapeutic action of dentally used drugs and be able to appropriately modify usage and dosing of standard drugs or substitute alternative medications.

ANTI-INFECTIVES IN THE DENTAL OFFICE: WHAT'S NEW?

3 CORE 1 CREDITS 12:00PM - 12:30PM REGISTRATION | 12:30PM - 4:00PM LECTURE

LEARNING OBJECTIVES

1. Recognize the prevalence of the various bacterial, fungal and viral infections in the daily dental practice.
2. Understand the rational use of anti-infective agents in dentistry, both in terms of the management of existing orofacial infections and for prophylaxis against the development of bacterial endocarditis or other infection post treatment.
3. Be informed as to potentially problematic adverse drug reactions and drug interactions arise between medications the patient may be taking for acute or chronic medical conditions and antimicrobial prescribed by the dental practitioner.
4. Understand the importance of organ function/disease status in altering the absorption, distribution, metabolism, and therapeutic action of dentally used antimicrobials and be able to appropriately modify usage and dosing of standard drugs or substitute alternative medications.

DR. AVIV OUANOUNOU, BSC, MSC, DDS, FICD, FICO

Dr. Aviv Ouanounou is an assistant professor of pharmacology at the faculty of dentistry, University of Toronto. He received both his DDS and MSc at the University of Toronto. He teaches pharmacology to undergraduate and graduate students and is also a clinical instructor and Treatment Plan Coordinator. Dr. Ouanounou won numerous teaching awards including “Best Teacher of the Year Award” in 2013 and 2015. Also, Dr. Ouanounou is the recipient of the 2014-2015 prestigious Dr. Bruce Hord Master Teacher Award for excellence in teaching at the Faculty of Dentistry at the University of Toronto. Dr. Ouanounou is a Fellow of the International College of Dentists. He is a member of the American Academy of Pain Management and the American College of Clinical Pharmacology. He has published and authored numerous articles in peer-reviewed journals. He also maintains a general private practice in Toronto.
