

Mastertrack Module #1

May 12-14, 2006, Niagara Falls, Ontario

The new cycle for the Mastertrack has just completed Module #1. This module was on Endodontics and on Digital Photography and Case presentation.

On Friday Dr. Kevin Calzonetti gave the Endodontic hands-on program that continued until Saturday at noon. We are grateful of sponsorship by Dentsply Tulsa Dental, Global Microscopes, Obtura Spartan and Sirona. The participants prepared anterior and posterior extracted teeth—some used the microscope to do this, then they obturated using the Vertical condensation technique. We saw some great cases using MTA to treat some otherwise hopeless cases, and as well some transplantation cases that Dr. Calzonetti had done.

Saturday afternoon, Dr. Joe DiDonato from Rochester, N.Y. taught all how to prepare a digital movie for a new case presentation using Windows Movie Maker and Windows Media Player. We all made our own personal office movie with sound and using our own photos for case presentation.

Sunday morning Rita Bauer from the University of Toronto gave a hands-on program on Digital Photography where the participants tried out the latest digital cameras. The participants all agreed that it was a great program with tremendous value for their CE dollars. We also had the pleasure seeing case presentations on previous modules by various Mastertrack participants—the quality of the Mastertrack doctors is second to none.

We look forward to the November 3-5, 2006 Module #2 on Implant Dentistry. The location again will be at the Renaissance Hotel in Niagara Falls. Dr. Peter Fritz, a Periodontist with a PHD will present this module. Keep these dates reserved for what will be a great program.

For more information you can contact our Mastertrack Director-Dr. A. Mancuso at 905-734-9901 or e-mail him at tmancuso@cogeco.ca.
