About the Speaker

Dr. Roberts received his doctor of dental surgery (D. D. S.) degree from the University of Illinois Dental School. He then spent two years in a dental residency at the University Of Texas Health Science Center in San Antonio. During this residency he received training in dental and implant surgery as well as sedation procedures. Dr. Roberts has been practicing dentistry in Dallas since 1987. He was awarded the “Young Dentist of the Year” in 1990 for Dallas County. He is a Fellow of the

American Association of Hospital Dentistry (F. A. A. H. D.). Dr. Roberts Served on the Dallas County Dental Society Board Of Directors from 1992 — 1996. He is currently serving as an adjunct assistant professor at the University Of Texas Health Science Center in San Antonio and lectures nationally in the area of general dental surgery

Course Synopsis

Are you looking for an opportunity to update your oral surgical skills and techniques? This course is designed for the General Dentist who is comfortable doing most oral surgical procedures but is looking for ways to improve predictability and confidence while decreasing stress. This workshop will help you understand and manage common oral surgical situations including dental implants, bone grafting, extraction and biopsies as well as recognizing when it is appropriate to refer.

Upon completion of this course, you will be able to:

- Perform predictable pre-operative evaluations in a systemic fashion
- Manage medically compromised patients including bisphosphonates issues
- Prescribe medications most commonly used for oral surgery
- Identify and select straight forward and predictable dental implant candidates
- Review principles of exodontia to effectively retrieve broken root tips
- Manage common post operative complications
- Apply effective biopsy techniques for routine lesion

****Note: The bring list will be emailed to you after registering for this course.**
