Staining and Glazing Ceramic Workshop
Presented by Todd Ehrlich, DDS, FAGD

Surface characterization and glazing of ceramic restorations are processes that most dentists do not perform. However, using simple techniques and proper equipment doctors can easily perform these tasks to a high level in their own office. This is a participation course where ceramic CAD/CAM restorations will be characterized and finished.

Learning Objectives

1. Learn the basics on ceramic firing.
 2. Discuss levels of equipment necessary for glazing.
 3. Discover simple staining and glazing techniques to be done in the office.
 4. Discuss lithium disilicate (EMax -- Ivoclar-Vivadent, Buffalo, NY) crystallization.
-

ABOUT THE SPEAKER

Dr. Todd Ehrlich graduated from the University of Texas Health Science Center at San Antonio Dental School and served as president of its Alumni Association. He is a certified CEREC Trainer through the International Society for Computerized Dentistry, Sirona Dental Systems, and Patterson Dental. His “Cerecology” training program is considered one of the premiere training seminars for the CEREC method. He is a beta tester for CEREC and EagleSoft Practice management software. He has lectured internationally on dental CAD/CAM technologies, and has published articles relating to practice management, digital photography, and the CEREC method in numerous dental trade journals. His case presentations are well known for his attention to detail, esthetics, and photography.

Dental companies such as Sirona, Patterson, Ivoclar-Vivadent, and Vident use his cases for marketing purposes. He serves as one of the few Administrators on Dental Town’s website forums.

Dr. Ehrlich runs a successful family and cosmetic practice outside of Austin, Texas with his wife, Kristine
