About the Speaker

Dr. David Sarver received his Bachelor of Science degree in 1973 from Auburn University. He then graduated from the University of Alabama School of Dentistry in 1977 and was named by ODK as the Outstanding Professional Student in the Medical Center. He obtained his post-doctoral master's degree and completed his certification in orthodontics at the University of North Carolina in 1979. He then opened his practice in Birmingham in 1979.

Dr. Sarver is a Diplomate of the American Board of Orthodontics, a member of the Angle Society of Orthodontists and currently serves as an adjunct professor at the University of North Carolina. In addition to his commitment to his private practice, Dr. Sarver has been very active in research and academic writing. He has authored the orthodontic text, "Esthetic Orthodontics and Orthognathic Surgery" and co-authored "Contemporary Treatment of Dentofacial Deformity." Additionally, Dr. Sarver is a co-author of the text "Contemporary Orthodontics", the most widely used orthodontic text in the world. Dr. Sarver's work was featured on the Today Show in a segment by Dr. Christine Dumas and Katie Couric. Dr. Sarver's award-winning research was also highlighted on The View in a segment with medical reporter Dr. Christine Dumas. Most recently, Dr. Sarver was named the 2010 Distinguished Citizen of the Year by Leadership Vestavia Hills.

The Expansion of Esthetic Vision & Technological Enhancement

Friday, February 17 • 9:00 a.m. - 5:00 p.m. • 7 hours lecture • AGD Code: 371

Registration & breakfast starts at 8:00 am • lunch is also included

About the Course

Remember dental school and the orthodontic department experience? As dental students, we saw the ortho department as the "skull and bones". In today's world of increasing interdisciplinary care however, treatment planning in orthodontics and esthetic dentistry has rapidly merged to being strikingly similar! In this presentation, Dr. Sarver will present current orthodontic thinking with an expanded esthetic vision which will synergize your team to achieve even more outstanding results. He will also introduce the use of technology for interdisciplinary treatment design, and quantification of treatment plans. Experience dramatic improvement in patient communication with digital imaging interfaces, and web interface for visual communication and even greater interdisciplinary collaboration.

Course Objectives

- Discuss diagnosis and treatment planning from a multidisciplinary perspective that expands how the dentist approaches cosmetic care
- Present recent developments in digital imaging to greatly enhance patient communication and understanding
- Present technologies for enhanced and effective communication
