

# Some warning labels are tough to swallow.

If you're taking a medication, there's a good chance that you're *not* doing anything about the dry mouth you experience. And you should! Dry mouth can make it difficult to swallow and speak, as well as cause extensive tooth decay and serious oral infections.

A Great Dentist can help you reduce dry mouth. Ask yours today or visit [www.agd.org](http://www.agd.org).

Experience *The AGD Difference*.
