

Interesting Cases from Oral Radiology Practice

Jyoti Mago, DDS,MDS,MDS

Subject: 730 Oral Medicine, Oral Diagnosis, Oral Pathology

Credits: 1

Method: Lecture

Thursday, Sept. 26 7:30pm-8:30p.m. CDT

Audience: Students, Residents, Dentists, Dental Assistants

Fee: \$37.50 (students and residents); \$75 (members); \$125 (nonmembers)

Description

The objective of this course is to provide an overview of various interesting and challenging radiographic findings in a case presentation format on imaging technologies such as FMX radiographs, panoramic radiographs and cone beam computed tomography images. The management and the follow-up of some of the findings will also be discussed.

Learning Objectives

1. Correlate radiographic findings with the final diagnosis.
2. Plan out the management of the disease process.
3. Plan the radiographic follow-up and treatment planning.

Speaker Bio

Jyoti Mago is an oral and maxillofacial radiologist currently serving as an assistant professor within the Department of Clinical Sciences at the University of Nevada, Las Vegas. With a fervent commitment to advancing the field of radiology, Mago embarked on a journey of extensive training, completing two esteemed oral and maxillofacial radiology specialty programs. She first refined her skills at Maharishi Markandeshwar University in India, followed by rigorous education at the renowned University of Connecticut School of Dental Medicine.
