A Case-Based Approach to Digital Dental Integration

COURSE OUTLINE

The World of Digital Integration has certainly come to Dentistry, but often the question is posed, "How can I apply this in my office?"

Dr Sharma will discuss numerous clinical applications for a Digital Workflow within your practice.

The objective will be to present clinical cases that utilized digital impressions, digital imagery for treatment planning, & design software for fabricating 3D printed or milled guides & appliances.

We will discuss how this vertical work flow is beneficial for:

- Guided Surgery/Endo,
- Fabrication of Sleep appliances
- Creating In-house Orthodontic Aligners
- Printing Models and eventually night guards & other appliances

Dr. Vishal Sharma was born, raised, and attended Dental School in Saskatchewan (class of 2004). He is currently the sole owner of 3 busy dental practices in downtown Calgary. Dr. Sharma is an advocate for incorporating technology in the dental office to help facilitate a more predictable treatment outcome for patients, in the most efficient and comfortable way possible.

Technological integration has been an ongoing journey for Dr. Sharma and his offices. He is along-time user of CBCT imaging, utilizes hard & soft tissue lasers daily, and is an avid Cerec user and educator. He is a Key Opinion Leader for Dentsply Sirona on their Joint Movement Tracker virtual articulator, their guided Endodontic Access System and is a Cerec Doctors Mentor. His clinical practice includes guided implant placement, Clear aligner therapy, digital anesthetic administration, dental sleep medicine and testing and exclusively using digital impression.

Ontario Academy of General Dentistry (Approval #219289)
Academy of General Dentistry Approved PACE Program Provider. FAGD/
MAGD Credit. Approval does not imply acceptance by a state or provincial
board of dentistry or AGD endorsement. 01/01/2010 - 12/31/2021
