DECODING HEALTHY ESTHETICS

A course for general dentists who want
to improve their patients smile and grow
their profit.

January 29, 2022

Live -streaming or in person at:

Marriott Irvine Spectrum
7905 Irvine Center Dr.
Irvine, CA 92618

Decoding Healthy Esthetics

Course Type: Lecture

CE Hours : 8 Hours

Subject Code: 780 Esthetics

This full day live lecture course will present multiple options to help the modern practitioner protect, preserve and restore their patient's teeth while being conservative and profitable.

Treatment options from early preventive product applications to complex comprehensive interdisciplinary adhesive reconstructions will be discussed and shared using meticulously documented clinical cases.

1 Understand different restorative techniques

Understand the different bonding systems, the value of the resin infiltration to reverse white spots, and how to properly select cases that are ideal for direct composite veneering

2 Perform effective procedures

Perform safe and effective non-vital tooth whitening, advancement of inter-proximal caries, and simple layering for beautiful optical effects that rival natural teeth.

3 Grow your business

Develop a fee structure to make direct restorations as profitable as indirect procedures.

The California AGD is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing dental education programs of this program provider are accepted by AGD for Fellowship, Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or any other applicable regulatory authority, or AGD endorsement. The current term of approval extends from 06/01/2016 to 05/31/2022. Provider ID 219290

Course Objectives:

- Understand the esthetic and biological benefits of re-mineralization.
- Know the advantages of at-home bleaching.
- Offer options to manage most issues associated with bleaching sensitivity.
- Perform safe and effective non-vital tooth whitening.
- Understand the different bonding systems that exist in the market, their advantages, disadvantages and indications for use.
- Understand the value of resin infiltration to reverse white spots and prevent the advancement of inter-proximal caries.
- Perform predictable fragment reattachment.
- Properly select cases that are ideal for direct composite veneering versus indirect porcelain veneers.
- Fabricate silicone matrices to aid and simplify composite application.
- Perform simple layering for beautiful optical effects that rival natural teeth.
- Texturize and polish composite resin to mimic the natural tooth.
- Perform composite repair and refurbishment.
- Develop a fee structure to make direct restorations as profitable as indirect procedures.

"Gone are the days of removing a significant amount of healthy tooth structure using esthetic restorative procedures."

Dr. Abdi Sameni

Clinical Associate Professor of Dentistry at Herman Ostrow School of Dentistry of USC, is the president and developer of the International Restorative Dentistry Symposium of Los Angeles. He is a former faculty for the "esthetic selective" and the former director of the USC Advanced Esthetic Dentistry Continuum for the portion relating to indirect porcelain veneers & former chairman of the "USC International Restorative Dentistry Symposium." Dr. Sameni lectures nationally and internationally. He is a member of The American College of Dentists, OKU National Dental Honor Society and the Pierre Fauchard Academy. Dr. Sameni maintains a practice limited to restorative dentistry in West Los Angeles, California.
