2025 IAGD FALL MEETING MASTERTRACK/FELLOWTRACK

Understanding What's Possible... and What's Not – Soft Tissue Concepts for the General Dentist

with
with Dr. Gordon Fraser

LECTURE COURSE

Friday, October 3, 2025

8:00 a.m. – 5:00 p.m.

*Friday lecture will be held at the Hilton Garden Inn,
4640 North River Blvd, NE, Cedar Rapids, IA 52411*

HANDS ON COURSE

SATURDAY, OCTOBER 4, 2025

8:00 a.m. to 5:00 p.m.

Saturday hands-on will be held at Dental Prosthetic Services (DPS), 1900 51st St NE, Cedar Rapids, IA 52402

SPEAKER

Dr. Gordon Fraser

It's important for the generalist to be able to differentiate those procedures which can be done in their office easily and successfully versus the ones they should send to the specialist. Dr. Gordon C. Fraser, Jr.'s presentations equip dentists with the knowledge and skills to perform in-house procedures and the discernment to identify cases requiring specialist intervention, fostering in-practice productivity and superior patient care.

Dr. Fraser has been trained as a Periodontist in the placement of dental implants and surgical procedures limited to the oral cavity. He is a graduate of Temple University and served our country as a periodontist in the United States Air Force. Dr. Fraser is an internationally acclaimed lecturer and has traveled internationally to teach dentists about periodontics and implant dentistry.

Dr. Fraser is the founder of PURE PERIO: an in-practice specialty provider and dental implant coaching program. He is the founder of Southern Georgia Dental Education, a resource for continuing education for dentists, hygienists, and team members. He is also a member of the American Academy of Periodontology, American Dental Association, Georgia Dental Society, National Dental Association, North Georgia Dental Society, and the Catapult Education Speakers Bureau.

Dr. Fraser lectures on periodontics, dental implants (from beginning to advanced placement and restoration), soft tissue considerations, 3D imaging, and implant overdentures. Dr. Fraser also trains doctors and their teams on how to begin placing and restoring dental implants in their offices.

PACE

ACADEMY of
GENERAL DENTISTRY
PROGRAM APPROVAL
FOR CONTINUING
EDUCATION

The AGD-Iowa is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing education programs of this program provider are accepted by AGD for Fellowship, Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry. The current term of approval extends from 6/1/2021 to 5/31/2025. ID# 219301 (renewal pending approval)

LECTURE

FRIDAY, OCTOBER 3, 2025

(8 hrs. AGD Perio Lecture Credit)

.....

UNDERSTANDING WHAT'S POSSIBLE...AND WHAT'S NOT – SOFT TISSUE CONCEPTS FOR THE GENERALIST

Soft tissue grafting is a technique sensitive procedure.

Gain expertise in soft tissue grafting, understanding the factors that determine success, whether you refer or perform these procedures. Grasping anatomic features is vital for identifying pathologies and structures needed to maintain the dentition. This knowledge enables clear patient communication and aligns their expectations with achievable outcomes, boosting their trust in the proposed treatments.

This course is designed for the general dentist who has limited or no experience with soft tissue procedures. Attendees will learn how defects in morphology, tooth position, and underlying boney support at implants and teeth determine soft tissue outcomes. Dr. Fraser illuminates facts vs. theory through case studies and examples. These concepts are key to the overall success of the dental practice, patient satisfaction, and bottom line.

We now offer a 25% discount on any lecture, weekend MT or the entire MT class for a new grad/young dentist (each CE offered), up to their 5th year out. (i.e., dental student graduated in 2025, their 1st year out would be 2026. They would get this discount for 2026-2030.) ***If you graduated in 2021 and after, this discount would apply!*** (Must be an AGD member)

- ### Learning Objectives:

 - *Appreciate features for diagnosing structural defects in hard and soft tissue*
 - *Understand outcomes by recognizing anatomic structures*
 - *Review communication techniques for aligning patient expectations*
 - *Determine which instruments are used in grafting procedures*
 - *Compare grafting materials and their proper use*
 - *Discover growth factors that enhance healing*
 - *Differentiate defect type to determine appropriate grafting technique*
 - *Learn how to perform root coverage procedures (with a simple four step process)*

.....

HANDS-ON TRAINING

SATURDAY, OCTOBER 4, 2025

DENTAL IMPLANTS ARE FOR THE GENERAL DENTIST: PLACEMENT AND RESTORATION FROM BEGINNER TO ADVANCED.

Implant dentistry is simple, affordable, and predictable. It's what your patients want.

In today's market, patients want everything yesterday. Implant dentistry has transformed to be able to give patients what they want today. Utilizing a combination of technology and knowhow, we can perform procedures in several visits rather than several months. Dr. Fraser demystifies implant dentistry and shows offices how to seamlessly integrate this vital dental procedure into their practice. More importantly, this course shows how to make implant dentistry cost effective, efficient, and affordable for patients. After all, people want teeth - not dental implants. Designed for the general dentist who has limited or no experience with dental

implants, attendees will learn the importance of treatment planning, diagnostics, and radiographic interpretation. This course covers procedures such as single tooth replacement, overdentures, and multiple tooth replacement in easy-to-follow, step-by-step protocols.

- ### Learning Objectives:

 - *Learn techniques which help the patient see the value in implant therapy*
 - *Improve communication skills that lead to increased case acceptance*
 - *Discover how line itemization can increase profitability*
 - *Guide the patient through the decision of fixed vs. removable prosthesis*
 - *Understand the appropriate use of traditional vs. mini-implants*
 - *Analyze CBCT scans to identify ideal sites for implants*
 - *Evaluate the anatomical limitations of each case*
 - *Discuss bone biology and osseointegration for clinical success*
 - *Perform the pre-implant oral, anatomical and radiographic exam*

.....

If you attend the entire 2-day course, you will receive 16 hrs. AGD Perio (subject code 490). Additional 16 hours of participation credit may be earned by presenting a clinical homework assignment after the course and presenting in March of 2026. There is an additional fee of \$500 if you are not in the IAGD Masterack).
