The Honorable Nancy Pelosi Speaker U.S. House of Representatives Washington, DC 20515

The Honorable Kevin McCarthy Minority Leader U.S. House of Representatives Washington, DC 20515 The Honorable Chuck Schumer Majority Leader U.S. Senate Washington, DC 20510

The Honorable Mitch McConnell Minority Leader U.S. Senate Washington, DC 20510

Dear Speaker Pelosi, Leader Schumer, Leader McCarthy and Leader McConnell:

On behalf of our collective organizations, we are writing to let you to know that we are all committed to addressing the oral health needs of all Americans – including older Americans. As Congress is discussing expanding Medicare to include dental benefits, we want to help you to provide the best oral health care to seniors while ensuring a robust provider network is in place.

The current Medicare program includes distinct "parts" that recognize the variability in delivery of health care services such as hospital care, physician services and prescription drugs. The dental care system is significantly different from the medical care delivery system. Based upon current legislative proposals, an expansion of benefits within the current Part B structure of Medicare would not adequately meet the needs of our dentists and Medicare patients. Dentists are unlikely to join a network based on the current Medicare Part B structure for a number of reasons, including:

- Low reimbursement rates that fail to address overhead costs associated with delivering dental care will strongly influence dentists' ability to participate;
- Undue burden on dentists by requiring compliance with regulations designed for the medical delivery system, such as those for Electronic Health Records, quality ratings, auditing/compliance, documentation, and more, further dissuading dentist participation.

The overall administrative burden of participating in Part B of Medicare will likely impact access to care for Medicare beneficiaries. Given that dental offices are vastly different than physician offices, applying the physician fee schedule system to fee schedules for dental care will not assure sustainability of the dental delivery system. This is a system that has high costs of maintaining and running an office, including dental equipment, supplies, lab costs, staffing needs, anesthesia, and personal protective equipment (PPE).

We look forward to continuing this important conversation with you and your staff as Congress considers how best to provide oral health care to our Nation's seniors. Should you have any questions, please contact Mr. Mike Graham with the American Dental Association at <u>grahamm@ada.org</u>.

Sincerely,
